Subject:	update SOW for Lighting audit & provide IGCE
Date:	Thursday, July 07, 2016 10:04:33 AM
Attachments:	FERC Electrical usage 1996.-2014.pdf comprehensive lighting audit.docx LDC30168 1217 07.14.pdf

---

We would like to issue a task on a contract that we will have in place in September. We would like to issue this as soon as possible, the audit must be done prior to the first phase of **Project 888.**

As I have mentioned in my previous e-mails we need an IGCE for this work along with the SOW.

The attached SOW is not complete, it does not have the wording for measuring the new state of the art lighting plant, which should include KW draw as well as estimated annual maintenance costs, for the new state of the art lighting system and controls

The new 1217 costs are as follows
$33,820 item **12. REPLACEMENT OF BULBS, TUBES, STARTERS**
$30,862 item **14. SYSTEM MAINTENANCE AND REPAIR *(Ballasts, fixtures, etc.)***

Subject: FERC - Capturing Energy Savings

Ron, We need your help with two items:

- Review and comment on the SOW for energy audit the FERC sent us.
- Set up a date and time to meet on site with FERC personnel to review placement, type and number of meters and related equipment to establish baseline foe audit.

These requests have been out there for a while coupled with the fact that the renovation project is moving forward on schedule time is short.

Thank you for your help.
